Wages in Insured Employment Increased by \$43.4 Million in Fiscal 1966 to a Record Total of \$607.8 Million

The Fiscal Year 1966 is written in the record as the best ever achieved in Montana from both employment and wage standards. Reflecting job records for each month of the year, wages paid to workers by employers covered under Montana's Unemployment Compensation Law

climbed by \$43.4 million from Fiscal 1965 to set a record breaking total of \$607.8 million for Fiscal 1966. The number of employers subject to the UCC Law increased by 92 during the year to a total of 16,235. These employers paid wages to an average of 119,261 wage earners, 4,137 more than were on insured payrolls in Fiscal 1965. It is to be noted that all figures and references contained in this publication relate only to employers, workers, and wages subject to the unemployment insurance law of Montana.

All Industry Groups Show Gains

All seven major industry groups, listed on the last page of this publication, recorded advances in both wages paid and in the number of workers employed during the year. Trade industries showed the biggest gain, both employment and wage wise. Employment in trade firms exceeded Fiscal 1965 by 1,400 workers and wage totals increased by \$11.2 million to a Fiscal 1966 wage total of \$183.2 million, the highest single total for any industry. Manufacturing gained 928 workers while wages were up \$10.8 million for a total of \$139.6 million. More moderate employment gains were chalked up in the other five industry groups. Increased wage totals from Fiscal 1965 for these groups were in this order: Construction, up \$8.8 million to \$83.9 million; Transportation, Communications and Utilities, up \$3.3 million to \$60.8 million; Service Industries, up \$2.7 million to \$52.3 million; Mining, up \$2.2 million to \$51.2 million; and Finance, Insurance and Real Estate, up \$2.1 million to \$34.7 million.

Most Counties Share in "Statewide" Item

The total payroll of any particular county shown in this report is subject to some minor factual increase by reason of the item of "statewide" employment. This consists, as mentioned in footnote 3 of the employment and wage table, of employers whose operations belong in no particular county, or in many different counties. These employers submit payroll reports on a statewide basis without a definitive breakdown of employment and wages for each county where they have activities or operations. There is at present no effective means at hand for allocating these payrolls to any given county. Most of the employers in this "statewide" group are in transportation and utilities, and in retail and wholesale trade. During Fiscal 1966 there were 463 such employers who paid \$105,251,972 in wages to 17,699 workers.

- (3) Statewide employers are those whose operations are not ascribed to an individual county. This includes firms with units or operations organized on a multi-county pattern and reporting as a single enterprise. Also included are some employers whose base operations shift from one location to another, such as construction contractors. Wages and employment of such concerns represent approximately 16.4 percent of the state total. In a factual sense this category affects the employment economy of all Montana counties, proportionately to such factors as their population, commercial and industrial pattern, utilities represented, and volume of construction.
- (4) Does not include employers who did not have employees during fiscal year. Employers are carried on Commission records until "none" reports have been received for two years.

County Wage Averages

Average earnings are derived from gross wages reported, divided by average number of employees on covered payrolls. Comparative figures for fiscal 1966 and 1965 are hereby arrayed, by county:
